Passionate for strategy, consulting, and finance, I am comfortable with ambiguous and ever-changing situations, due to my ability to solve problems through critical and analytical thinking, skills acquired as part of my engineering background. I am also a team player, capable of working collaboratively with a creative approach. Also, my almost two-year experience in UK, France, and USA from an early age and at university student level along with my communication and interpersonal skills have allowed me to develop the ability to communicate effectively while becoming a more flexible person.
